

Work Flow and Evaluation Model

Finalize Care Plan

A conversation between resident, staff dermatologist and referring provider (+/- Patient) occurs

Follow-up

Ensuring resolution and modifying the care plan as needed, along with the capture of Follow-up DLQI and PGA

Derm Advice needed

1-778-771-3376 to be connected to the service and establish the GP's preferred method of communication

Virtual "Handshake"

Establishing a means of secure transfer of clinical photographs via secure SMS or encrypted Zoom videoconference, or BlackBerry Enterprise Messenger

Resident first contact

A senior dermatology resident establishes initial impression and plan based on information submitted.

Resident reviews with Staff Dermatologist

Ensuring patient safety and diagnostic accuracy, each plan is reviewed

Referring doctor submits information

Clinical photographs and medical history is submitted. Included are required Baseline Physician's Global Assessment (4-point scale) of severity, and Dermatology Life Quality Index (DLQI) score.

Resident writes letter

A summary of the conversation, including impression and plan is drafted and sent to the Referring Doctors Fax machine or e-Fax for direct entry into patient medical record.

Baseline Data stored

Research coordinator and Medical office assistant ensure each consult has baseline DLQI and PGA entered into research database.
